“Starbucks Grande”

Leather seats are a premium “get” at the new Starbucks in the A Concourse.

Lattes are flowing from the new Starbucks that opened this week in the A Concourse. You can let the smell of Starbucks brew lead you to the counter or you can spot it just beyond Gate A3. The store replaces a smaller Starbucks in the concourse. This expanded version offers more seating and traditional café amenities seen in most Starbucks locations. Passengers will find cushioned leather seats and wood side tables to read or work on their laptops while enjoying coffee and pastries. This is now the largest of six Airport Starbucks locations.
