“New Checkpoint”

Members of the Washington University football team move through the new East Terminal checkpoint that opened this week.

More Lanes! Lambert’s got them now with the opening of a second checkpoint in the East Terminal. The two new security lanes at the west end of the East Terminal will give Lambert 50 percent more screening capacity during times of peak demand. The additional lanes will improve waiting times for passengers flying Southwest Airlines, USA 3000, Air Choice One and charter flights. Lambert is anticipating an increase in passengers during the holidays and new charter flights to Mexico this winter. The new checkpoint will be ready for even more demand in the spring of 2010 when Southwest will add as many as 13 flights a day.
