July 17, 2009

“Airport Fireworks”

The new “Windows on St. Louis” exhibit features a chance to direct your own fireworks show over the Gateway Arch.

A special exhibit is drawing crowds who have new incentives to explore before they pick up their luggage at Lambert. “Windows on St. Louis” is a six month display located in the Main Terminal Baggage Claim. It highlights six area arts and culture destinations with unique windows showcasing St. Louis art, sculptures, photos and memorabilia. The Gateway Arch “window” gives visitors a chance to direct their own fireworks show through computer touch-screen technology. Other highlights include an amazing look at mosaic tile art, Chuck Berry’s “Walk of Fame” star, contemporary art sculptures and images as well as a military museum showcase.
