“Lambert Wears Red for Heart Disease Awareness”

Lambert employees and partners wear red to support heart disease.

Today, Lambert employees and partners who were able to attend gathered for a photo shoot to show their support for women's heart disease on National Wear Red Day®.

National Wear Red Day was created in 2002 by the National Heart, Lung and Blood Institute to generate more attention of women's heart disease. The campaign provides an opportunity for everyone to participate in this life-saving awareness movement by wearing red.
