

## **Lambert-St. Louis International Airport® Environmental Policy**

**Lambert-St. Louis International Airport® is committed to comply with environmental laws and regulations, prevent pollution, and continually improve our environmental performance. Our Environmental Management System (EMS) provides the framework for identifying environmental priorities, setting goals, and for monitoring progress.**

**The environmental leadership of Lambert-St. Louis International Airport® will support the economic and employment growth of our airport, city, and region. This leadership is driven by a comprehensive approach and commitment to improve how we address environmental issues.**

**Our commitment to continually improve environmental performance includes engaging the passengers who use our airport, airlines that operate at our facilities, residents who live in the surrounding communities, and tenants and contractors who support our airport. We will keep these stakeholders informed of our environmental performance and our efforts to achieve environmental benefits for our community.**
