

## SERVICING ST. LOUIS FOR OVER 50 YEARS!

Spirit of St. Louis Airport has been the Business Aviation Center of the Midwest for more than 50 years. Much more than just a place to land, it is a benefit-packed resource for pilots, passengers, and businesses that use and serve general aviation. Spirit provides the environment and physical assets necessary to meet and maintain world-class aviation support services, specifically designed to meet your needs.

The "down home" Midwest hospitality, along with the first class professional facilities and personnel, sets Spirit apart from services normally associated with a busy complex aviation facility. Four full-service Phillips Aviation Performance Centers (APCs) and over 150 businesses located at the airport can address your every need.

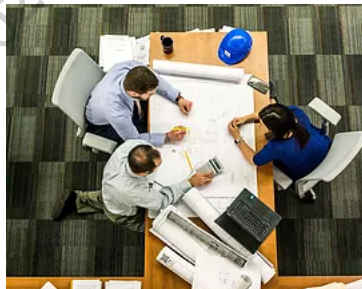

A 7,485 foot all weather runway, 5,000 foot parallel runway, precision approaches, FAA Control Tower, and 24-hour Customs Services makes Spirit the right choice when choosing an airport in St. Louis.
