

X-CELL ELECTRIC (MBE)

X-Cell Electric Company is a certified MBE with the state of Missouri and with the St. Louis Lambert International Airport. Owner Jose Madrid has more than 15 years of experience in all aspects of the electrical and telecommunications industry.

Since forming as a company in 2011, X-Cell Electric has become one of the most successful minority-owned electrical contracting businesses in Missouri. The company employs master electricians with experience in both commercial and residential settings.

X-Cell can perform a wide range of work from installing new wiring and lighting to electrical repairs in homes to HVAC, telecommunications wiring, and fire alarm systems. The company also has experience with installing large-scale solar panel grids as well as with a wide range of other emerging electrical technologies.

X-Cell has experience working as a subcontractor for larger electrical companies looking for minority participation partners and has partnered on big projects to small-scale needs.

“Our customers usually need electrical work to be done quickly and with an eye for quality,” Madrid said. “We have the most highly-trained, industry-certified master electricians working for both commercial and residential clients.”
