

SAFETY POLICY STATEMENT

St. Louis Lambert International Airport (STL), in partnership with its senior management, is committed to maintaining the highest standards of safety through the implementation and continuous improvement of a comprehensive Safety Management System (SMS). The SMS provides a formal, proactive approach to identifying hazards, assessing and mitigating risks, and promoting a positive safety culture throughout the airport.

STL encourages all airport employees, air carriers, tenants, contractors, and the traveling public to actively participate in the SMS by reporting hazards, incidents, accidents, and other safety concerns that may affect airport operations. Open communication and active participation are essential to fostering a culture of safety, accountability, and continuous improvement.

Airport senior management is committed to providing the leadership, policy direction, and resources necessary to support the effective implementation and ongoing success of the SMS program. STL will strive to ensure compliance with applicable safety standards and regulatory requirements, proactively manage operational risks, and continuously enhance safety performance. Safety is a shared responsibility and a fundamental priority in all airport operations.
